

Home Power Generator using “Zero-Point” Energy

The Zero-Point is created by a Blinking Universe.
RF Sweep across 1,101,361,642,963 Hz or 2X

Note: To maximize output, the coil should resonate at a sub-harmonic of the Lighthouse Frequency.

VAdiodes.com & OMLinc.com make harmonic mixers, that can reach Terahertz frequencies. (Not an endorsement. These devices can be made by any precision machine shop.)

Calculate the Blinking Frequency of our Universe - One Mathematical Approach:

The anthropic principle states that observations of our physical universe should be compatible with the life (us) that observes it. Using the Anthropic Principle, we can demonstrate a "fundamental" energy with the fundamental temperature/freezing point of water, and the Boltzmann constant:

$$3 * 8.62E-05 \text{ eV/K} * 273.15 \text{ K} = 70.614 \text{ meV}$$

and then convert this into a frequency using the Planck constant
 $70.614 \text{ meV} / (\hbar * \pi^4) = 1.1 \text{ THz}$

Note that π^4 is π^D , where D is the number of spacetime dimensions.

The full equation can be found in "Blinking Universe: Alternate Mathematical Solution" and this is an approximation. Experimental tests need to be performed to determine the precise frequency. Using the Anthropic Principle, the calculated value, using the most precise values available is: 1,101,361,642,963.57 Hz
